

Addendum for FU80/NF80/QS80 software version 1.3

This addendum documents important updates that are included in the FU80, FU80 and QS80 software version 1.3. This software version is done to cover new requirements in edition 2 of display standard IEC 62288.

The FU80/NF80/QS80 User manual (988-10199-005) is updated to include all new features. The manuals is available for download from navico-commercial.com and simrad-yachting.com.

The following changes have been made to the software:

Changes to the Alert system

If the remote units are installed in a system that has to comply with regulation for alert handling as defined in edition 2 of display standard IEC 62288, the **Alert handling** has to be set to SOLAS.

In SOLAS alert handling mode, the following applies:

- all alert handling has to be done from an AP70/80 control unit
- any remote unit will not make an alert sound, and alerts are identified by text only

Press **CMD** key on the remote unit to return to last active mode display. The icon remains on the display until the alert is rectified.

Alert text

Alert indication on mode display

New status icon

A new screen alive indicator icon has been added. The indicator is a black square moving up/down in the top left corner of the screen.
